EDUCATION

University of Southern Mississippi

Bachelor of Science in Computer and Information Science

Hattiesburg, MS

May 2029

- GPA: 4.0 | President's List | Honors College
- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Design, Computational Data Analysis, Software Development

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS, C/C++

Frontend: React, Tailwind CSS, React Router, Recharts

Tools & Technologies: Git/GitHub, VS Code, Streamlit, Pandas, Plotly, REST APIs, Microsoft Excel

Concepts: Data Structures & Algorithms, Object-Oriented Design, Agile Development, Software Development & Testing

AI/Development: Generative AI Tools, Prompt Engineering, AI-Assisted Development Workflows

PROJECTS

JobJar – Job Application Tracker | *React, Tailwind CSS, React Router, Recharts, Git* | [Live Demo](#)

- Built and deployed a full stack job application tracker featuring reusable UI components, client-side state management via React hooks, and multi-page routing with React Router.
- Designed an interactive dashboard with KPI cards, status and role-type filter pills, and a responsive data table with real-time status updates.
- Implemented an Analytics page with stacked bar charts using Recharts to visualize application distribution by type and status; deployed live on GitHub Pages with automated CI.

RentSearch – Live Rental Search Platform | *Python, Streamlit, REST API, Git* | [Live Demo](#)

- Built and deployed a full stack rental search web application integrating the Zillow API via RapidAPI, enabling real-time property search across the US by city, ZIP code, and neighborhood.
- Implemented dynamic filtering by rent range, bedrooms, pet policy, and home type with live KPI metrics computed from API response data.
- Designed a responsive card-based UI with property photos and Zillow estimate comparisons; deployed to Streamlit Cloud with automated CI via GitHub.

PennyBloom – Personal Finance Tracker | *Python, Streamlit, Pandas, Plotly, fpdf2* | [Live Demo](#)

- Collaborated with a classmate to build a financial analysis web application with transaction categorization, spending trend detection, monthly predictions, and real-time budget alerts.
- Generated structured PDF reports and interactive visualizations to support data-driven decision-making; iterated on features through testing and debugging cycles.

LEADERSHIP & EXPERIENCE

Vice President

Bangladesh Student Association, USM

April 2026 – Present

Hattiesburg, MS

- Led a team of **5** officers in coordinating community initiatives, cross-organizational partnerships, and member engagement programming.

Secretary

The Nations, USM

April 2026 – Present

Hattiesburg, MS

- Coordinated logistics and communication for events serving **100+** attendees across multiple student organizations.

Founder & CEO

TroKiosk (E-Commerce Platform)

Sept 2023 – Nov 2024

- Built and operated an e-commerce platform with **25+** products; analyzed sales and customer data to drive data-informed pricing and operational decisions.
